Career Objective:

Meticulous web developer, passionate about creating beautiful, exceptional user experiences. I'm looking for an opportunity to join a company where I can collaborate with a team to solve problems while developing myself.

Professional experience:

- **NVPC** - Front-End Developer
  November 2021 - Now
  Contributed with designers and developers in the planning and implementation of a design system in a multi-brand product. Worked from architecture through development (translating graphics to pixel-perfect components) and publishing of a library, which decreased our time to market and enabled a more consistent UI through multiple websites.

Education:

- **Trybe** - Full Stack Web Development
  April 2021 - April 2022
  In more than 1500 hours, the course covers web development fundamentals, front-end, back-end, computer science, software engineering, agile methodologies and soft skills.

Projects:

- **GraphQL Countries API with color theme switcher**
  Next, GraphQL, Dart-Sass, BEM, Gulp, PostCSS, Webpack
  GitHub, Website

- **Trivia API Quiz**
  Next, Redux, styled-components, REST API, Babel
  GitHub, Website

Skills:

- **Tools & Technologies:**
  - **I use on a day-to-day basis:** React, TypeScript, Sass, Git, GitHub, Storybook, Rollup
  - **I'm experienced in building web applications with:** HTML, CSS, JavaScript, Next, Redux, styled-components, CSS Modules, PostCSS, Webpack, GraphQL, REST, Vercel
  - **I'm familiar with:** Jest, React Testing Library, Redux Toolkit, React Query, Babel, Gulp
- **Languages:**
  - **English** - Proficient (EF SET Certificate)
  - **French** - Advanced (TCF)
  - **Portuguese** - Native
- **Other:** Agile Methodologies
